Clean Diesel Technologies, Inc. (CDTI) Annual Meeting

BRIDGEPORT, Conn., Apr 21, 2009 (GlobeNewswire via COMTEX News Network) -- Clean Diesel Technologies, Inc. (Nasdaq:CDTI), the cleantech emissions reduction company, today announced that its Annual Meeting of Stockholders will be held at 10:00 a.m. on Wednesday, May 13, 2009, at The Bridgeport Holiday Inn, 1070 Main Street, Bridgeport, Connecticut 06604, U.S.A. Agenda items include election of directors; authorization to delist Clean Diesel's Common Stock from the AIM Market of the London Stock Exchange; ratification of independent auditors for 2009; and transaction of any other business that may properly come before the Annual Meeting or any adjournment.

About Clean Diesel Technologies

Clean Diesel Technologies (Nasdaq:CDTI) is a cleantech company providing sustainable solutions to reduce emissions, increase energy efficiency and lower the carbon intensity of on- and off-road engine applications. Clean Diesel's patented technologies and products allow manufacturers and operators to comply with increasingly strict regulatory emissions and air quality standards, while also improving fuel economy and power.

The Company's solutions significantly reduce emissions formed by the combustion of fossil fuels and biofuels (without increasing secondary emissions such as nitrogen dioxide, NO₂), including particulate matter (PM), nitrogen oxides (NO_x), carbon monoxide (CO) and hydrocarbons (HC). As a result, they are effective for: OEMs, Tier 1 suppliers and retrofit providers; businesses entering the emissions control market seeking solutions and expertise; operators requiring compliant emissions solutions; fuel, biofuels and additive suppliers seeking low emissions and energy efficient products; and regulators creating public policy. Clean Diesel's solutions, therefore, are ideal for such markets as: on-road vehicles, construction, mining, agriculture, port/freight handling, locomotive, marine, and power generation.

Clean Diesel develops and manages intellectual property from original concept to full-scale commercial deployment. Building on its almost 300 granted and pending patents, its offerings include ARIS(r) selective catalytic reduction (SCR); the patented combination of SCR and exhaust gas recirculation (EGR); hydrocarbon injection for emissions control applications; Platinum Plus(r) Fuel-Borne Catalyst (FBC); the Purifier(tm) family of particulate filter systems; and its wire mesh filter particulate filter technologies. The Company was founded in 1995 and is headquartered in Bridgeport, Connecticut. A wholly-owned subsidiary, Clean Diesel International, LLC is based in London, England.
