## **Clean Diesel Technologies, Inc. Wins approximately \$700,000 in New Orders under New Jersey's Mandatory State-Funded Diesel Retrofit Program**

VENTURA, Calif., April 30, 2012 /PRNewswire/ -- Clean Diesel Technologies, Inc. (NASDAQ:CDTI) ("Clean Diesel"), a cleantech emissions control company, announced today that its Heavy Duty Diesel Systems division has won new orders valued at approximately \$700,000 for its verified (approved) emission control products. The new orders were received under the New Jersey Department of Environmental Protection ("NJDEP") Mandatory Diesel Retrofit Program. To date, Clean Diesel has won over \$3.4 million in orders under the program. Shipments of these new orders are expected to be completed in the second quarter of 2012.

Clean Diesel's ECS-branded Purifilter® Plus diesel particulate filter (DPF) emissions control system was approved by the NJDEP for retrofitting under the Mandatory Diesel Retrofit Program which requires owners of certain diesel-powered vehicles and equipment, such as dump, recycling and tow trucks, to install control devices to reduce the emissions of fine particulate matter, commonly called "soot." The State is investing in this program, which requires the retrofitting of a variety of vehicles and equipment by established deadlines.

More information on the NJDEP Mandatory Diesel Retrofit Program can be found on the State's dedicated website at [www.stophesoot.org](http://www.stophesoot.org).

### **About Clean Diesel Technologies, Inc.**

Clean Diesel is a vertically integrated global manufacturer and distributor of emissions control systems and products, focused on the heavy duty diesel and light duty vehicle markets. Clean Diesel utilizes its proprietary patented Mixed Phase Catalyst (MPC®) technology, as well as its ARIS® selective catalytic reduction, Platinum Plus® fuel-borne catalyst, and other technologies to provide high-value sustainable solutions to reduce emissions, increase energy efficiency and lower the carbon intensity of on- and off-road engine applications. Clean Diesel is headquartered in Ventura, California and currently has operations in the U.S., Canada, U.K., France, Japan and Sweden.
