Clean Diesel Technologies Announces Compliance With NASDAQ Listing Requirements

BRIDGEPORT, Conn., Aug 27, 2010 (GlobeNewswire via COMTEX News Network) -- Clean Diesel Technologies, Inc. ("CDTI") (Nasdaq:CDTI), a cleantech emissions reduction company providing sustainable solutions to reduce emissions, today announces it has cured its deficiencies under the independent director and audit committee requirements for continued listing on The NASDAQ Capital Market set forth in Listing Rules 5605(b)1 and 5605(c)2 (the "Rules").

Based on the recent appointment of Frank J. Gallucci and David W. Whitwell to the Company's Board of Directors and audit committee, NASDAQ has determined that Clean Diesel is in compliance with the Rules.

About Clean Diesel Technologies, Inc.

Clean Diesel Technologies is a cleantech company providing sustainable solutions to reduce emissions, increase energy efficiency and lower the carbon intensity of on- and off-road engine applications. Clean Diesel's patented technologies and products allow manufacturers and operators to comply with increasingly strict regulatory emissions and air quality standards, while also improving fuel economy and power.

The Company's solutions significantly reduce emissions formed by the combustion of fossil fuels and biofuels, including particulate matter (PM), nitrogen oxides (NOx), carbon monoxide (CO) and hydrocarbons (HC) -- without increasing secondary emissions, such as nitrogen dioxide (NO2). As a result, they are effective for: OEMs, Tier 1 suppliers and retrofit providers; businesses seeking solutions and expertise upon entering the emissions control market; operators requiring compliant emissions solutions; fuel, biofuel and additive suppliers seeking low emissions and energy efficient products; and regulators creating public policy. Clean Diesel's solutions, therefore, are ideal for on-road vehicles and applications in a wide range of industries, including construction, mining, agriculture, port/freight handling, locomotive, marine and power generation.

Clean Diesel develops and manages intellectual property from original concept to full-scale commercial deployment. Building on almost 200 granted and pending patents, its offerings include ARIS(R) selective catalytic reduction (SCR); the patented combination of SCR and exhaust gas recirculation (EGR); hydrocarbon injection for emissions control applications; Platinum Plus(R) Fuel-Borne Catalyst (FBC); the Purifier(TM) family of particulate filter systems; and its wire mesh particulate filter technologies. The Company was founded in 1995 and is headquartered in Bridgeport, Connecticut. A wholly-owned subsidiary, Clean Diesel International, LLC is based in London, England.
